4x1.5MW (6MW) Fairbanks Morris Power Generating Station for Sale

60Hz. 4160V Natural Gas Only

Complete 6MW Natural Gas Engine Generator Power Station.

Call for price

(4) 1500kW Fairbanks Morris power generators, MEP engine, model MEP 8t. Kato Generators, model A241530000. Air-X-Changer radiators (coolers), model 132-2Z. all skid mounted. MCC panels, auto switching, battery backup with charger. Includes schematics, manuals and maintenance log books - master log book and individual log books detailing preventative maintenance per unit. Annual inspections - conducted with Fairbanks Morse (MEP); preventative maintenance every 72 to 96 hours - rotating - one unit down, three remained in operation. Current fuel: natural gas - may be converted. 8-cylinder turbo charged, diesel 1500kW 60Hz.

All four engines were installed by Sept/Oct 1987.

The engines are currently configured to operate solely on +/- 900 BTU (LHV) Natural Gas fuel. At additional expense they may be converted to run Dual Fuel with a .5 -6.0% diesel fuel pilot ignition, or convert to straight diesel. Both of which may be fairly expensive as it will require the cylinder liners and control systems to be upgraded and changed.

All units are set up to operate as prime power providers for continuous run operation.

We can provide engine air and heat data for emissions if needed. We'll need the estimated operating altitude.
